Speaking broadly, Chinese Medicine is a complete body of thought and practice grounded in Chinese Daoist philosophy.. To download this video Traditional Chinese Veterinary Medicine (TCVM), although relatively new to the Western world, is a medical system that has been used in China to treat animals for thousands of years.. Chinese Medicine is based on the Daoist worldview that the body is a microcosm of the larger, surrounding universe.

It is an adaptation and extension of Traditional Chinese Medicine (TCM) used to treat humans.. Though it can be traced back over two millennia in recorded history, it, like any medical system, continues to evolve today, and current research on acupuncture and herbal medicine is beginning to shed light on its mechanism of action.
