It's got all the randomness that comes with a deck-building game, but it also has a lot of things that mitigate the randomness - character powers, specific actions on cards, and most cards are a building that have to be placed strategically on the grid.. Featuring voice talent from Angela Mayans, Ben Britton, Ruth Rosen, Ed Bretten, Kyle Chapple, John Mondelli and Barbara Hawkins.. An underappreciated gem Well worth full price, though it goes on sale from time to time.. 0Ghz or AMD Phenom

[ly/2NGeIyp](http://bit.ly/2NGeIyp)About This GameA city planning deck-building game!Concrete Jungle is a new take on the city building genre that swaps micro-management for a more strategic and puzzle-orientated style of city planning.. As the city grows, bigger and better new buildings can be added to your deck!As you get opportunities to hone and refine your deck, residents will demand more from you.. Alternatively engage in competitive city planning against challenging AI or local players.. It looks like the main complaints (apart from people who thought it was a sim) are that it's too random and too difficult, and I definitely sympathize with both of those things.. Hilarious fully voice-acted story mode!Competitive city planning featuring challenging AI in 'Versus' mode.. Local competitive/co-op multiplayer for up to 4 players or AI Gorgeous vibrant, detailed isometric graphics, day/night and weather effects. b0d43de27c [Mac Min Mojave Can Find Screenshots App](#)
