Sushi and wasabi Let's start with one of the most iconic teams in Japanese cuisine, sushi and the fiery paste that is wasabi.. Nutrients in seaweed help to reduce both blood pressure and sodium levels in the body.. Ordinarily, diners get a double punch of wasabi with each piece of sushi, as a dab of the condiment is placed in the rice, which is then dipped into a mixture of soy sauce blended with yet another dollop of wasabi. Traditions are taken very seriously in Japan, and one of the most noticeable examples is Japanese food.. So if you're worried about eating your food raw, bear with the spiciness of the wasabi.. This Japanese gold-colored 5 yen coin has a diameter of 22mm Following are 10 culinary collaborations that won't just fill you up and satisfy your taste buds, but leave you a little healthier, too.. Rice balls and laver While we're on the subject of plants from the ocean, what about the type of seaweed called laver that's used to wrap onigiri, or rice balls? At first this seems like something done strictly for the sake of convenience.. It turns out, though, that seaweed helps compensate for one of the only health drawbacks to miso soup: its high sodium content.. Given its flimsy texture and near total lack of flavor, you'd be forgiven for assuming the seaweed isn't there for anything other than aesthetic purposes. 0041d406d9 [Garuda Indonesia Affiliate Program](#)
